

2024 USRA DECAL PLACEMENT

All decals must be in the upright position and positioned in the required locations on both sides of the race car using official decals supplied by the USRA. If decals are embedded into the design of the race car wrap, they must be of the same colors, size and dimensions of the official decals supplied by the sponsors. Altering the size and/or colors (i.e. washed out or color blending) will be considered the same as no decal at all.

The official USRA logo decal must be positioned on the A-pillars or nearest the top of the leading edge of the door panels. Other mandatory decals for every USRA-sanctioned event include American Racer (except Factory Stocks and Tuners), MVT and Summit. The American Racer and Summit decals must be positioned nearest the top of the leading edge of the door panels, below the USRA logo decal. American Racer decal may be positioned above the wheel openings.

The Allstar Performance decal is required to be eligible for Alstar of the Month Award. The PBM decal is mandatory for Central Region events. The Sunoco decal is mandatory for Factory Stocks. Some contingency sponsors may also require their decal in order to be eligible for awards offered by those sponsors.

USRA MODIFIEDS USRA B-MODS USRA LIMITED MODS
